The primary development language for AutoCAD and its immediate predecessors is FormTalk (also known as Form3D or Form/3D). Developed by Lexar Media, FormTalk is the proprietary scripting language for generating forms and levels from AutoCAD files. It is closely related to the Adobe Illustrator scripting language and was the predecessor to Autodesk's discontinued AutoLISP. FormTalk is integrated with AutoCAD. In the official AutoCAD files, the.FTL file extension indicates the presence of a FormTalk form or level file.
